CYCLOTRON SOLUTIONS – ION 12SC

Simple. Reliable. Productive.

Simple and easy to use:

The ION-12SC is incredibly simple to operate with just the touch of a few buttons.

Reliability:

Key features of the system (always-on, superconducting magnet; internal targetry) have fewer “moving parts” and are less prone to failure.

Productive:

The ION-12SC is capable of producing multiple isotopes, including: ●

F-18

Oncology, Neurology

Able to produce enough F-18 to provide for multiple PET/CT scanners with doses all day

N-13
Ammonia

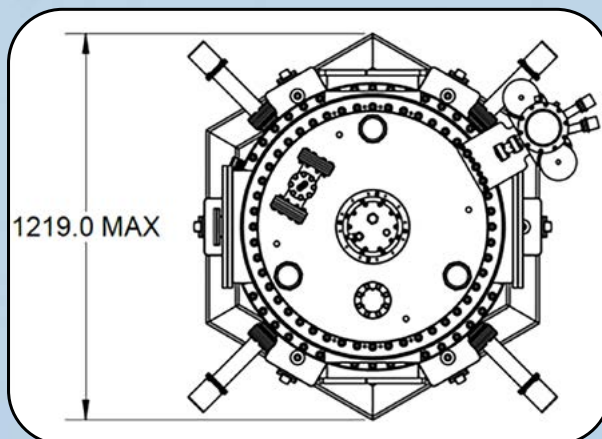

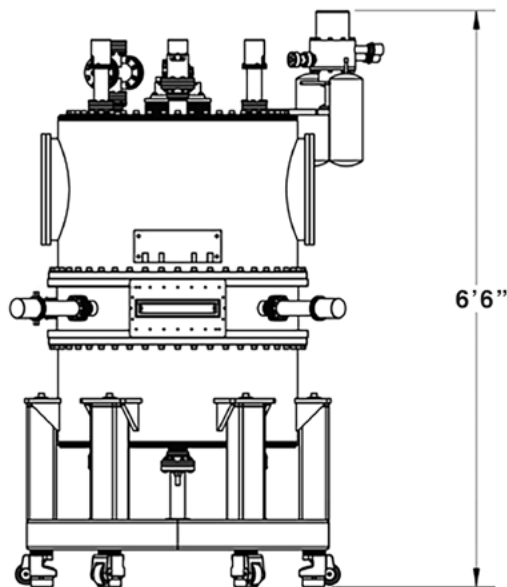

Cardiology

At just 8 minutes per doses production, the ION 12sc can power the most robust Cardiac PET program

Ga-68

Oncology, Urology

Gallium-68 products without the need or limitations of a generator

cGMP SOLUTIONS

Integrated. Streamlined. Proven.

- **Integrated:**

Our eQMS platform and cGMP programs are part of the workflow and seamlessly integrate into our manufacturing process - the IONETIX Solution means quality is built in.

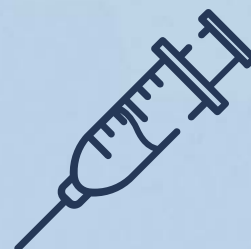

- **Streamlined:**

The experts at IONETIX can handle all the paperwork, procedures, filings, and inspections on your behalf. From the FDA to the NRC to the local requirements and anything in between – solving your complexity is our core competency.

- **Proven:**

Our cGMP program and FDA compliance approach has been vetted across multiple sites, with numerous inspections, and various ANDAs – our proven record means your risk is mitigated before you even begin.

OPERATIONAL SOLUTIONS

Comprehensive. Right-sized. Flexible.

- **Comprehensive:**

All the equipment, set up, and trained staff you need to take you from isotopes to on-site cGMP radiopharmaceutical manufacturing – the last mile solved!

- **Right Sized:**

Our small footprint and minimal staff requirements make the IONETIX solution ideal for self-supply hospitals and imagers – we fit where others don't with easily manageable overhead costs.

- **Flexible:**

Radiopharmaceutical supply catered to your schedule and your unique needs – calibration times, activity, products – what you need when you need it!

IONETIX is a cyclotron and technology company providing full-service radioisotope production and end-to-end radiopharmaceutical manufacturing solutions. Utilizing its proprietary cyclotron technology platform, IONETIX has developed innovative solutions that enable access to scarce radioisotopes used for both diagnostics and therapeutic radiopharmaceuticals.
